WHY COMMUNITY AWARENESS

An Acquired Brain Injury can change your life forever. Our panel of presenters will share their lived experience to demonstrate the behaviours that can typically lead to a brain injury and the impact this has had on their lives. A brain injury not only affects your life choices and independence but has an enormous impact on family, friends and loved ones. A Brain Injury is for life.

OUR PRESENTERS

Our presenters know the impact that living with a Brain Injury has on daily life. These presentations describe what it is like to live with daily challenges that typically result in a loss of independence, choice and control. Our speakers know the risks, facts and the consequences of high-risk behaviour. Their compelling stories will challenge your thinking and drive home the message that after a Brain Injury your life will never be the same again.

TARGET GROUP?

- ✓ High School students who are learning to drive or have recently been granted their provisional licence.
- ✓ Teachers and Educators who know the importance of explicit learning and confronting messages conveyed by our presenters
- ✓ Community groups such as PCYC'S who facilitate courses for offenders and individuals who may engage in high risk behaviour: e.g. substance use, speeding or negligent driving.

LEARNING OUTCOMES

- ✓ Facts and information about Acquired Brain Injury in Australia
- ✓ Typical causes of Acquired Brain Injury
- ✓ High risk behaviours and their potential impact
- ✓ Consequences of living with an Acquired Brain Injury

HEADWAY ADP is funded by South West Area Health Service which has played an important role in improving the lives and social participation of people with an ABI.
